

SD-WAN HSEC License Install

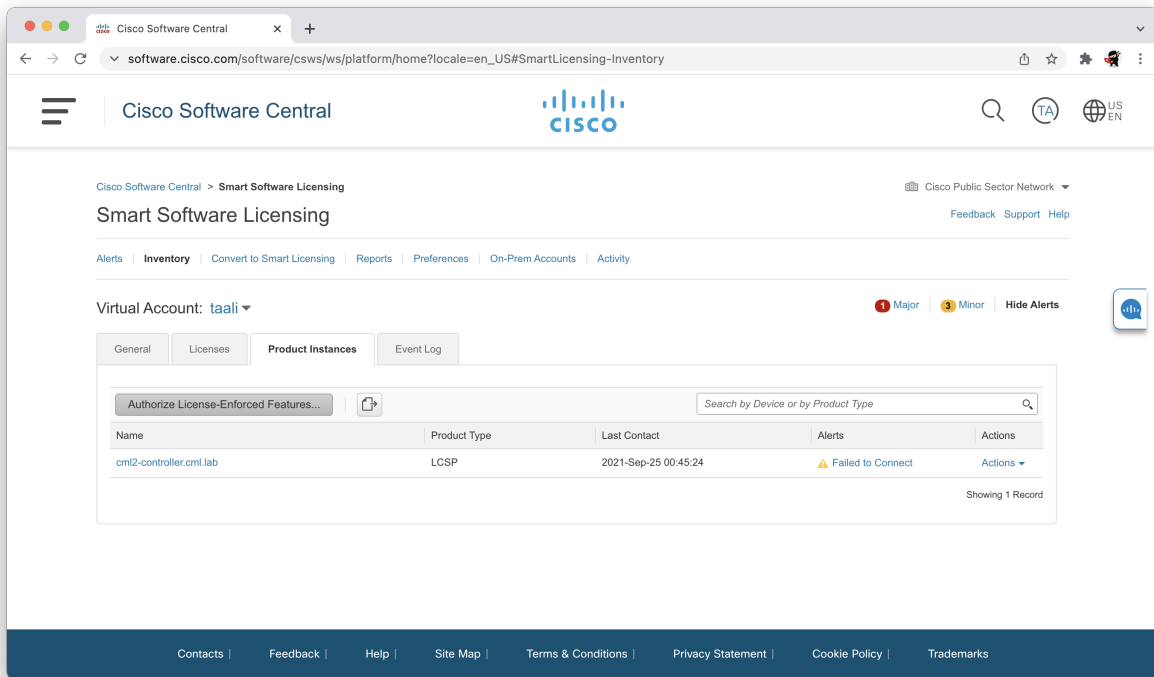

Obtain chassis and serial numbers from the routers:

```
TSN1#sh sdwan certificate serial
```

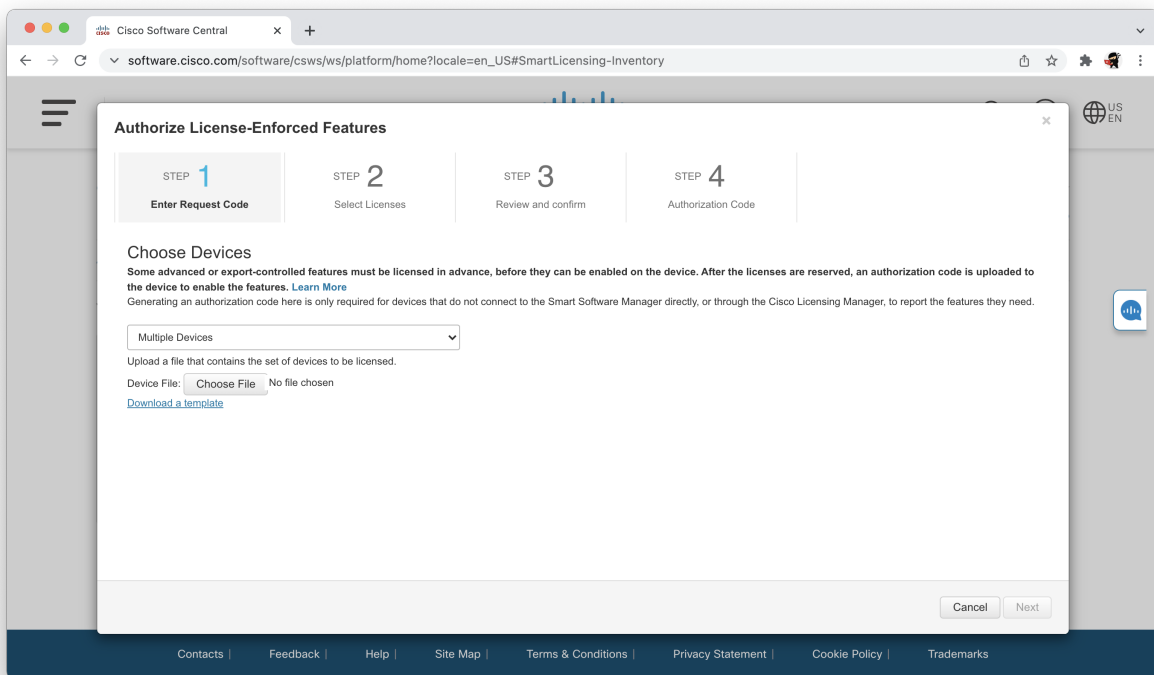

```
Chassis number: C1121-8PLTEPWB-FGL231312MJ Board ID serial  
number: 018A88F3 Subject S/N: FGL231312MJ
```

Once you have chassis and serial numbers:

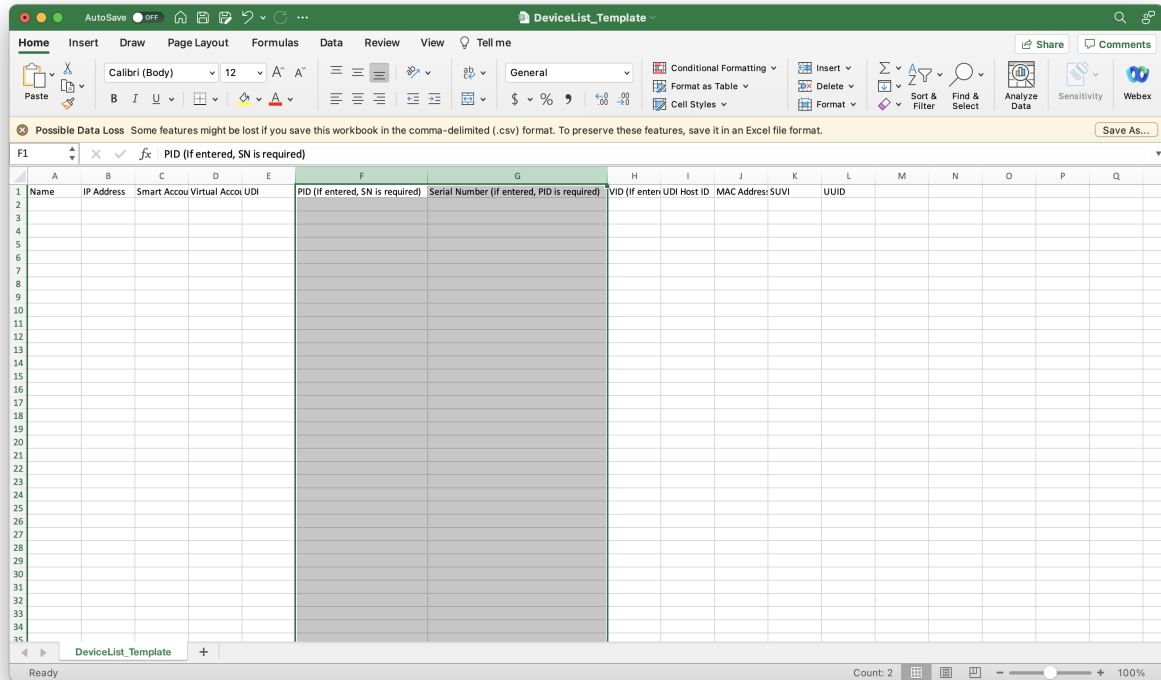

- Log in to your Smart Account and select the appropriate Virtual Account (fbi-dcap)
- Select the Product Instances tab
- Click on the Authorize License-Enforced Features:

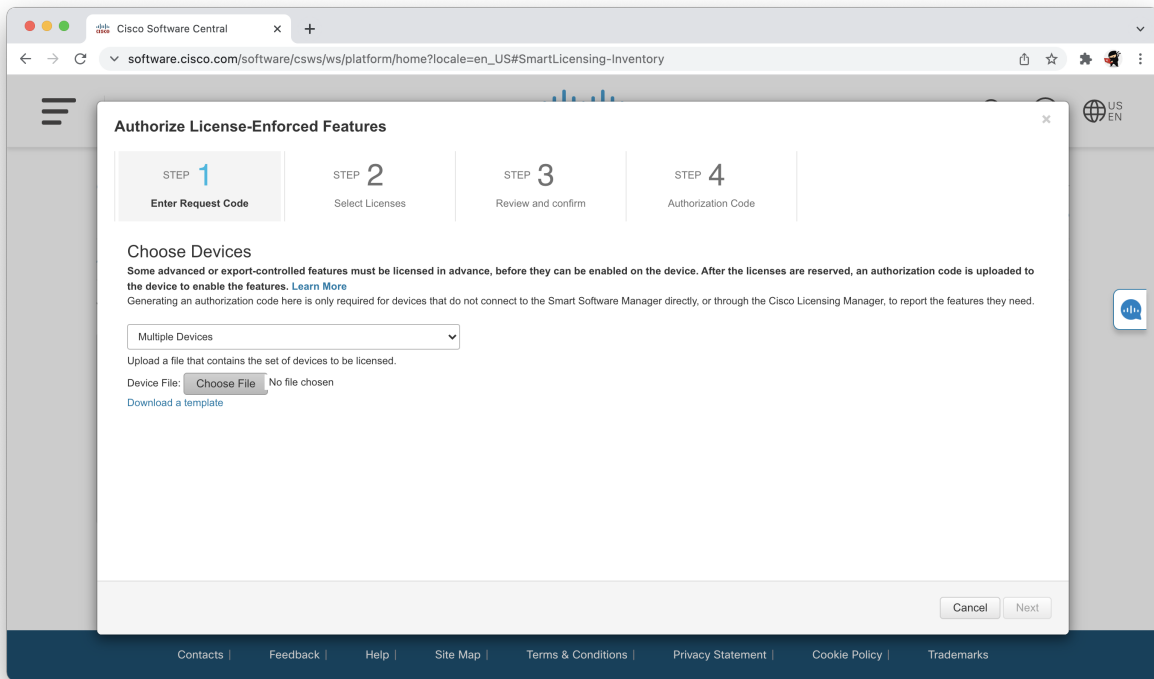

- Select Multiple Devices from the drop down list and click on Download a template:

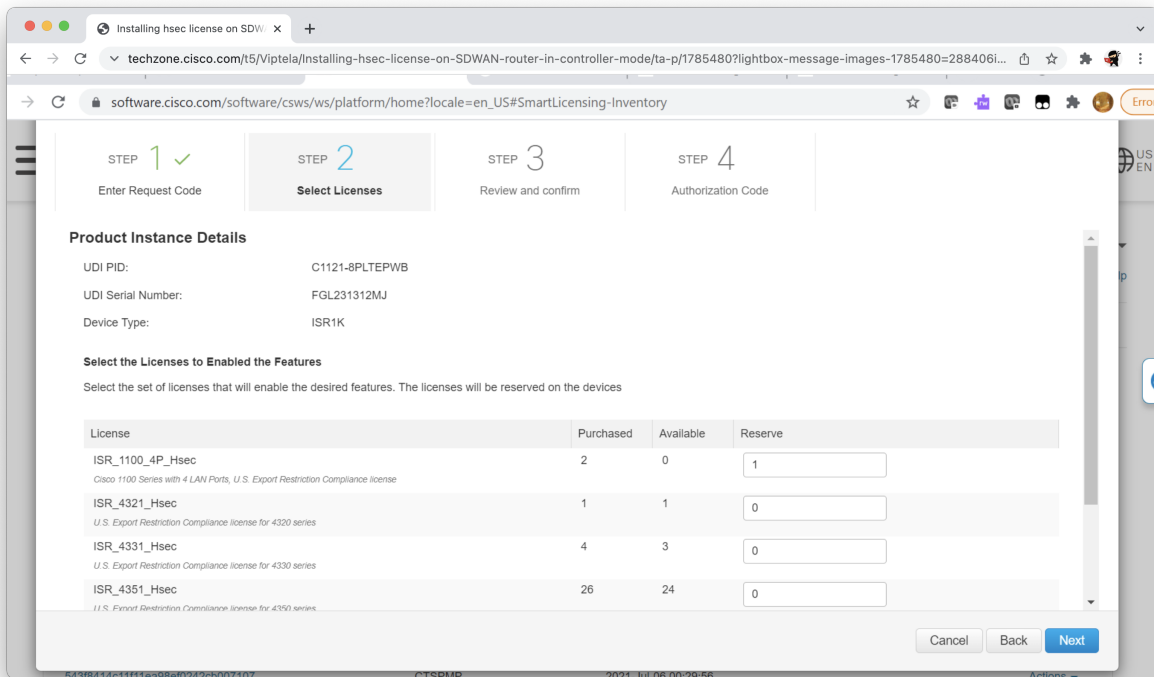

- Enter the Chassis Numbers in the PID column and Serial Numbers in the Serial Number column of the template file:

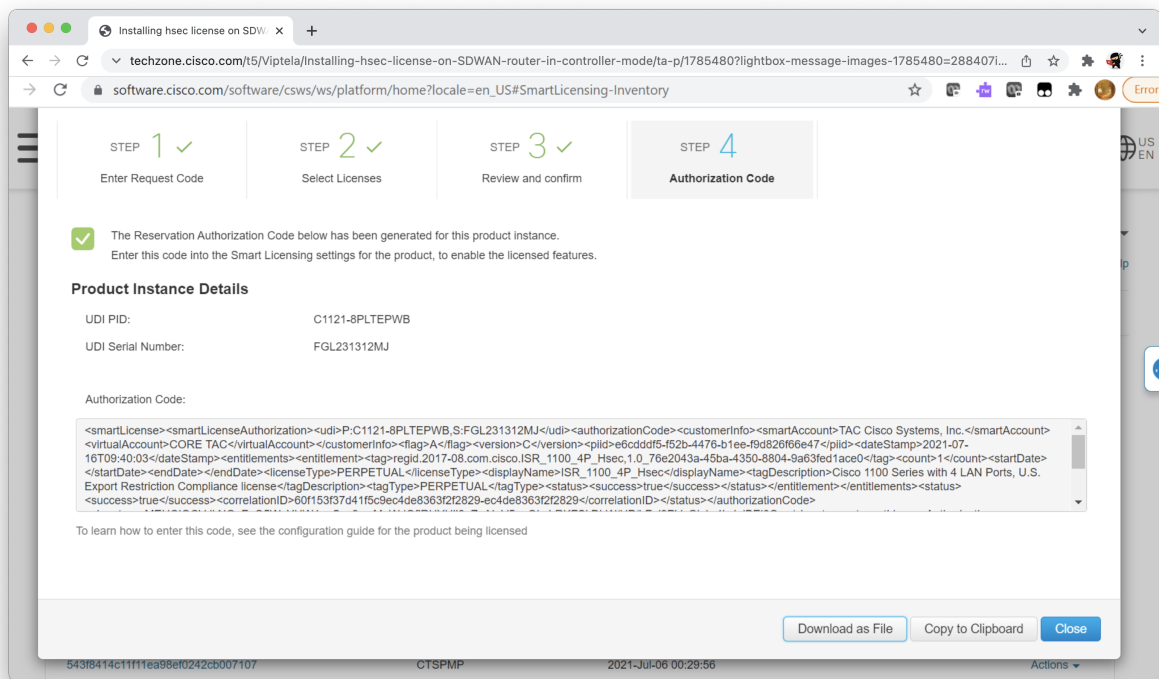

- Upload this file by clicking Choose File and selecting Next:

- Select the HSEC licenses for your Cat8Ks and click Next:

- In Step 4 click Download as File and save the license:

- Copy the file to TFTP and install the licenses:

```
TSN1# copy tftp: bootflash:
Address or name of remote host []? 10.76.76.160
Source filename []? auth.r txt
Destination filename [auth.txt]?
Accessing tftp://10.76.76.160/auth.txt...
Loading auth.txt from 10.76.76.160 (via Vlan1): !
[OK - 1578 bytes]
1578 bytes copied in 0.032 secs (49313 bytes/sec)
```

```
TSN1#license smart import bootflash:auth.txt
```

```
TSN1#sh license summary
```

```
License Usage:
```

License Status	Entitlement Tag	Count
ISR_1100_4P_Hsec IN USE	(ISR_1100_4P_Hsec)	0 NOT

```
Reload the router to enforce the license
```
